Phone : 0146063786

Email : nurfathi02@gmail.com

Address : Petaling Jaya, Selangor.

SUMMARY

Motivated and detail-oriented **Information Technology graduate** with **First Class Honours (CGPA 3.79)** and multiple academic accolades, including the **Dean's List Award (October 2022 and April 2024)**. Currently working as an **AI Developer as Protégé at Credence**, gaining hands-on experience in **web application development, GitHub**, and the creation of **reusable digital and website templates**. Passionate about **UI/UX design**, with a strong interest in creating **intuitive, user-friendly, and visually engaging digital experiences**. Previously gained professional experience through internships at **DXC Technology and Green Packet**, with exposure to **technical support, API testing, and eKYC systems**. Combines **technical knowledge, creativity, problem-solving skills**, and an understanding of user needs to develop effective digital solutions. Seeking opportunities to contribute to **UI/UX, digital product development, AI, and technology-driven projects**.

EDUCATION

City University Malaysia (Jan 2022 – Feb 2025)

Bachelor of Information Technology | **CGPA: 3.79** | **First Class Honours** | **Dean's List Award in Oct 2022 and April 2024**

City University Malaysia (Jan 2021 – Dec 2021)

Foundation of Information Technology | **CGPA: 3.80**

WORKING EXPERIENCES

1. Credence (July 2026– Present)

AI Developer Protégé

- Presented and demonstrated the company's digital products and solutions to customers, clearly explaining key features, functionality, and benefits.
- Developed and customized reusable website templates using Visual Studio Code, creating flexible designs that can be adapted for different projects and customer requirements.
- Applied AI and web development tools to support the development of digital solutions and improve the overall functionality and user experience of templates.
- Explored and implemented reusable UI components and layouts, helping to improve development efficiency and maintain consistency across multiple website projects.
- Used GitHub for version control, project management, and maintaining development work across different projects.

2. Green Packet | Protege Program (Talent Suites) (July 2025 – Oct 2025)

Technical Support Executive

- Successfully completed a 4-month Protege placement under Talent Suites, gaining hands-on exposure to enterprise-level technical support and digital systems operations.
- Managed and resolved an average of 30–50 customer support tickets weekly using Zendesk, ensuring timely responses while maintaining 95% service quality compliance.
- Performed API testing and validation using Postman, identifying request/response issues and supporting troubleshooting efforts to improve system reliability.
- Executed manual eKYC verification processes, accurately reviewing customer identity documents and ensuring 100% compliance with regulatory and internal verification standards.
- Supported the Selangkah digital system, assisting in issue resolution, system checks, and operational support for government-linked digital services.

3. DXC Technology (Oct 2024 – Feb 2025)

Cloud Engineering Intern

- Supported project coordination and daily operational activities within the Cloud Engineering team, ensuring smooth execution of assigned tasks and deliverables.
- Gained foundational exposure to cloud engineering systems, workflows, and best practices, learning directly under the guidance of experienced cloud engineers and managers.
- Completed multiple cloud-related online courses, strengthening technical knowledge in cloud concepts, infrastructure fundamentals, and service models.
- Assisted in preparing project documentation and progress updates, contributing to clear communication and alignment within

the team.

- Prepared and delivered structured presentations to team members, effectively communicating internship projects, learning outcomes, and technical insights.

PROJECT EXPERIENCES

- **Manual eKYC Processing System Experience** (Oct 2025)
 - Reviewed and verified customer identity documents with high accuracy to support secure digital onboarding processes.
 - Cross-checked customer data across internal systems to identify existing eKYC profiles, reducing duplicate registrations.
 - Performed manual eKYC registrations for new or unmatched records in strict accordance with standard operating procedures.
 - Coordinated with verification teams and relevant departments to obtain timely approvals for submitted documentation.
 - Updated system records and notified customers upon successful verification, ensuring end-to-end process completion and improved customer satisfaction.
- **Final Year Project (FYP) - Second Place Winner: Website Galaxy Explorer** (Aug 2024)
 - Designed and developed a web-based application using HTML, CSS, JavaScript, PHP, and MySQL (XAMPP), focusing on educational and exploratory content.
 - Built and managed database structures, enabling efficient storage, retrieval, and management of website data.
 - Conducted extensive problem-solving and debugging, resolving functional issues to ensure stable and smooth system performance.
 - Implemented user-friendly interfaces and creative layouts, improving usability and visual appeal for end users.
 - Designed and developed multiple system modules and pages, covering diverse functional areas of the application.

EXTRACURRICULAR ACTIVITIES

- **Faculty of Information Technology Event** (July 2024)
 - Supported event operations by managing food sales and game booths, handling customer interactions efficiently.
- **Outdoor Adventure & Recreation Society (Kembara Club)** (Feb 2024)
 - Participated in outdoor and team-based activities including cycling, boating, and group challenges, strengthening teamwork and collaboration skills.

SKILLS

- **Technical skills:**
 - **Technical Support & Troubleshooting** (L1, accounts, monitoring,)
 - **API & Software Tools:** Postman, Zendesk, JIRA, XAMPP, Github.
 - **Programming & Development:** HTML, CSS, JavaScript, C++, PHP, React, Tailwind CSS.
 - **Digital Verification & Security:** Manual eKYC processing, secure document verification, compliance adherence.
 - **Productivity & Collaboration Tools:** Microsoft Office Suite, Exce, Canva, CapCut Editor.
 - **UI/UX & Design:** Figma, Canva, Responsive Design, UI Design
- **Soft Skills:**
 - **Effective Communication**
 - **Problem-Solving & Analytical Thinking**
 - **Collaboration & Teamwork**
 - **Adaptability & Continuous Learning**
 - **Time Management & Prioritization**
 - **Creative Thinking & Design Interest**
- **Languages:** Malay (**Native**) | English (**Full Professional Proficiency**) and Tamil (**Oral Proficiency**)
